

NEWS RELEASE

Collectis to present new data update on its allogeneic CAR T cell therapeutics at the 19th Congress of the European Hematology Association (EHA)

June 10, 2014 – Paris (France) – Dr. Julianne Smith, PhD, VP CART Development at Collectis (Alternext: ALCLS.PA) and Dr. Roman Galetto, PhD, Project Leader, will be attending the 19th Congress of the [European Hematology Association](#) in Milan, Italy from June 12th to 15th, 2014.

Roman Galetto will present a study entitled: **MULTIPLEX GENOME EDITING OF TCRALPHA/CD52 GENES AS A PLATFORM FOR “OFF THE SHELF” ADOPTIVE T-CELL IMMUNOTHERAPIES** on the late breaker session to be held on Saturday, June 14th at 1:30pm in the Auditorium (NW – Level 3).

Disruptive innovation in oncology by gene editing and T cell CARs

Collectis is developing innovative cancer products based on engineered T cells armed with a Chimeric Antigen Receptor (CAR) to target liquid and solid tumors. Collectis' state-of-the-art genome engineering technologies together with the next generation of msCAR and an allogeneic cGMP manufacturing process for CART products take this new paradigm shift in oncology to the next level of the industry. The Company's pipeline focuses on leukemia and solid tumors.

About Collectis

Collectis is a biopharmaceutical company focused on oncology. The company's mission is to develop a novel generation of therapy based on engineered T-cells to treat cancer. Collectis capitalizes on its 14 years of expertise in genome engineering, based on TALEN™, meganucleases and the state-of-the-art electroporation technology Pulse Agile, to create a new generation of cancer immunotherapy for treating leukemias and solid tumors. Collectis adoptive cancer immunotherapy for chronic and acute leukemias is based on the first allogeneic T-cell chimeric antigen receptor (CAR) technology. CAR technologies are designed to target surface antigens expressed on cells. These treatments reduce toxicities associated with current chemotherapeutics and have the potential for curative therapy. The Collectis Group is focused on life sciences and uses leading genome engineering technologies to build innovative products in various fields and markets. Collectis is listed on the NYSE Alternext market (ticker: ALCLS). To find out more about us, visit our website: www.collectis.com.
